

Plexus[®] PLASTIC CLEANER PROTECTANT & POLISH

HOW DOES IT WORK?

Plexus cleans by enveloping dirt and dust particles then lifting them from the surface to avoid scratching it while wiping the contaminants away.

It protects by actually sealing the pores in the plastic making it more resistant to foreign substances and other debris. In doing this, Plexus also facilitates future cleanings.

Plexus polishes with an invisible, non-cumulative, micro thin layer of protectant.

Its anti-static properties help to repel the dust and lint usually attracted to plastic.

**BECAUSE AIRCRAFT WINDOWS
DONT LOOK LIKE THIS ANYMORE!**

Plexus[®] PLASTIC CLEANER PROTECTANT & POLISH

“Originally developed
for the aviation industry,
Plexus cleans, protects and
polishes all types of plastic.”

Plexus[®] PLASTIC CLEANER PROTECTANT & POLISH

CLEARLY THE BEST

Finally...
an easy and effective way to clean,
protect & polish all clear or coloured plastics!

What is Plexus?
simply, the most effective product you can use to clean,
protect and polish all clear and coloured plastics as
well as most painted surfaces.

Originally developed for aviation applications, specifically to
preserve the clarity of the very expensive plastic aircraft canopies,
windows and windshields.

All purpose cleaning products

containing ammonia, alcohol and/or abrasives can prematurely
deteriorate plastic surfaces, leading to discoloration, brittleness,
crazing and lack of clarity.

Plexus cleans polishes & protects

with out the use of harmful chemicals or abrasives, providing a
fresh surface that's clean, lustrous and protected.

Plexus penetrates

the stain and lifts it from the surface so that it can be removed
without grinding it into the plastic causing scratches.

Anti-Static

To repel the dust normally attracted to plastic

Additionally

as Plexus is wiped away, an invisible micro thin layer of protectant
is applied, sealing the porous surface, making it more resistant to
dirt, debris & other contaminants, this helps to prevent crazing,
yellowing & oxidation.

**WHEN YOU'RE LOOKING FOR THE MOST
EFFECTIVE CLEANER, PROTECTANT &
POLISH FOR ANY KIND OF PLASTIC...

PLASTIC CLEANER PROTECTANT & POLISH

Plexus works on countless plastic products, preventing premature wear while helping them to look their best. Plexus produces a shiny, cleaner more lustrous finish with no smears or smudges. It makes coloured plastics vibrant, clear plastics virtually transparent and plastic paints gleaming like new.

Of course, there's really only one way to be convinced about the superiority of Plexus: Try it for yourself!
