

POWERHOUSE PERFORMANCE

radenso **RC M**

Oozing with technology, the new radenso **RC M** has class leading performance.

The beautifully designed display gives a factory look and has the best clarity of any Custom Fitted Unit available. The **RC M** utilises the very latest HDM+ Antenna hardware and has expanded K-Band coverage to suit the NZ Reflex Camera's.

These units also come preloaded with the NZ Fixed Camera Database.

This model offers the very best in Radar and Laser Detection.

radenso RC M

With the release of the RC M, the market was put on notice that here is a new challenger for the TOP SPOT in Radar and Laser detection.

With class-leading performance and the highest level of customisation of any detector on the market today, the RC M not only incorporates superb design but has the blistering performance to boot. The optional rear antenna greatly enhances detection behind you and the RC M also allows for full integration of the optional AL Priority enhanced Laser detection system.

This product is so good we use it in our own cars.

Class-leading range

Arrow Direction Display when optional rear antenna fitted

GPS lockouts of false alerts

Invisible to radar detector detectors

Blind spot monitor and cruise control filters

Detects MultaRadar

Updatable firmware and NZ Camera Database with free lifetime updates

OPERATING BANDS

- X-Band - Deleted for NZ
- K-band: 23.950 GHz - 24.250GHz (Unique NZ spec)
- Ka-band: 33.4 GHz - 36.0 GHz
- Ka-Narrow band (4 segments for fine tuning)
- MRCD (MultaRadar)
- MRCT
- Gatso
- Laser 904nm

DISPLAY TYPE

- Directional Arrows (with optional RC M Rear Antenna)
- Magnetically removable display for stealth install
- OLED
- Bar Graph
- Frequency Display
- Multiple brightness levels
- SmartDark and Full Dark Display

RADAR RECEIVER / DETECTOR TYPE

- Superheterodyne
- Invisible to Spectre and VG2 Radar Detector Detector
- Best-in-class false alert filtering
- Traffic Sensor filter
- Blind Spot Monitor Filtering

LASER DETECTION

- Quantum Limited Video Receiver
- Multiple Laser Receivers

GPS RECEIVER

- Ultra-fast connection
- AutoCity Mode
- Automatic Speed Based Muting
- GPS Lockouts of false K Signals

SENSITIVITY CONTROL

- Highway, Auto and Auto City

Front Radar Laser antenna
(Optional rear antenna available)

RC M Display & Control Module

Radenso RC M CPU

Optional AL Priority Laser Sensors

GPS Antenna
