

Uniden®

EXTREME LONG RANGE RADAR & LASER DETECTORS

R8

R4

NEW ZEALAND DEVELOPED SOFTWARE TUNED FOR OUR MARKET

The all-new R8 is the newest addition to the industry's most talked about lineup of radar detectors.

Its dual antenna allows the R8 to detect threats from all directions, with voice alerts indicating the direction of threat. It also shows the band, and signal strength for each.

A large ultra-bright OLED display makes visual alerts clear and easily readable plus the front-mounted mark button and voice alerts mean more focused attention on the road.

FEATURES

- Twin Low Noise Amplifiers for improved sensitivity and longer range
- Front facing mute and mark buttons
- NZ red-light & speed camera alerts
- Laser gun Identification
- Advanced K/Ka band false alert filtering
- GPS technology with auto mute memory
- Auto mode (varies sensitivity based on speed)
- Bluetooth for changing settings via phone app

The R4 is an all new platform with a much greater range.

It has a new Auto Mute Memory feature, which automatically locks out false alert locations.

The R4 also has the best K Band filter on the market, so you get the least amount of false alerts from blind spot monitors and K Band radar-based cruise control systems in other vehicles.

When you need the best information possible, and none of the noise, Uniden's R4 Extreme puts you well ahead.

FEATURES

- Over-speed warning alerts
- Twin Low Noise Amplifiers (LNA's)
- NZ red-light & speed camera alerts
- Auto Mute Memory - automatically locks out false alert locations
- Quiet Ride (speed-based Auto Mute)
- Voice Notifications
